Objective

Computer Engineering student seeking internship opportunities spanning software development, hardware systems, and their integration. Brings Java and Python experience, technical communication skills, and coursework in data structures, digital system design, and circuit analysis.

Education

Georgia Institute of Technology | Atlanta, GA *Aug 2026 - Present*
Bachelor of Science in Computer Engineering *Expected Dec 2028*

Bellevue College | Bellevue, WA *Sep 2024 - Jun 2026*
Transfer coursework | GPA: 4.0/4.0

Relevant Coursework

Completed: Object-Oriented Programming; Linear Algebra; Probability and Statistical Modeling; Differential Equations; Multivariable Calculus
In Progress: Data Structures and Algorithms; Digital System Design; Circuit Analysis; Discrete Mathematics

Skills

Programming: Java; Python (statistical analysis coursework)
Tools: Eclipse; JUnit; Google Colab
Languages: Japanese (native); English (professional proficiency)

Projects

Crazy Eights Console Game | Java, Eclipse *Dec 2025*
Individual extra-credit project | Bellevue College

- Adapted an instructor-provided card-deck framework into a playable console game, adding approximately 400 lines of Java over two weeks. Implemented game flow, player input handling, and rule enforcement.
- Designed a deterministic opponent that conserved wild eights, prioritized legal cards from the most common suit in its hand, and selected that suit after playing an eight to improve follow-up options.
- Translated strategies used by human players into explicit, situation-specific decision branches, enabling consistent choices across game states without relying on random selection.

Experience

Bellevue College | Bellevue, WA *Sep 2025 - Jun 2026*
Math Tutor | Math Lab

- Diagnosed conceptual gaps by asking students to explain their approach, then tailored explanations using clear reasoning steps, diagrams, and simplified examples.
- Tutored algebra, precalculus, calculus through multivariable calculus, linear algebra, and differential equations in approximately 20 one-on-one sessions per week, each lasting 10-20 minutes.
- Chose whether to introduce alternative solution methods based on each student's readiness and course learning objectives, avoiding unnecessary complexity and confusion.

Baskin-Robbins | Toyokawa, Aichi, Japan *Mar 2024 - Present*
Team Member (seasonal)

- Coordinated in two-person service pairs within teams of up to six during peak periods, rotating across order preparation, payments, restocking, and sanitation to maintain efficient service.

Activities and Honors

Seattle Cherry Blossom & Japanese Cultural Festival *Apr 2025*
Volunteer | Seattle, WA

- Provided Japanese-English directions during a two-day festival, guiding volunteers to assignments and break areas.

Phi Theta Kappa Honor Society | Member *Inducted Feb 2025*
